EDUCATION

2024-2028

RAJALAKSHMI ENGINEERING COLLEGE

- B.E Computer Science (Cybersecurity)
- CGPA: **8.04**

TECHNICAL SKILLS

OPERATING SYSTEMS

- Linux
- Windows

SECURITY TOOLS

- Wireshark
- Nmap
- SIEM
- Splunk
- Binwalk

SECURITY DOMAINS

- Security Operations (**SOC**) Basics
- OSINT Investigation
- Digital Forensics
- Steganography Analysis

SOFT SKILLS

- Teamwork
- Communication
- Leadership

CERTIFICATIONS

- **TryHackMe** – Pre Security Certificate
- **LetsDefend** – SOC Member
- **Infosys Springboard** – Basics of Python
- **TATA** - Cybersecurity Analyst Simulation
- **Skill India** - IT Forensic Analyst

ACHIEVEMENTS

- **1st place** - **EcoNova Hackathon**, Rajalakshmi Engineering College
- **2nd place** - **CyberShield CTF,** Rajalakshmi Engineering College
- **6th place** - **XploitX CTF**, Prathyusha Engineering College

WORK EXPERIENCE

Internship - Cybercrime Intern

Cybercrime Wing, Tambaram Commissionerate, Shollinganallur

- Gained practical exposure to cyber laws, digital forensics, and cybercrime investigation procedures.
- Assisted in digital evidence collection, analysis, and evidence handling while maintaining confidentiality.
- Developed knowledge of cyber fraud, phishing, identity theft, cyber harassment, and investigation workflows.
- Appreciated by the Assistant Deputy Commissioner of Police for contributing to a confidential investigation under the POCSO Act.

Internship - TVS Supply Chain Solutions

Information Security Intern

- Completed a 1-month internship at TVSSCS, gaining exposure to GRC, security audits, risk assessment, compliance, and vulnerability management.
- Contributed to an AI-driven cybersecurity assessment platfform developed according to the company's requirements.
- Explored threat intelligence, PII protection, security awareness, and AI-assisted security automation, gaining practical exposure to enterprise Information Security operations.

PROJECTS

ATLAS (Automated Tracing and Live Attack SImulator)

- Developed ATLAS, an AI-driven cybersecurity assessment platform integrating vulnerability assessment, authorized penetration testing, and automated security workflows using FastAPI and Python.
- Integrated Nmap, OWASP ZAP, OpenVAS, and OpenSCAP for security assessment, with centralized orchestration and approval-controlled penetration testing.
- Designed dynamic attack graph generation and risk prioritization by combining vulnerability findings, business context, and threat intelligence to identify potential attack paths and prioritize remediation.
